Adapters for DIN and American Rails

**Specifications**

**Description:** Cooper Bussmann® DIN rail adapters permit secure, positive snap-on mounting of Cooper Bussmann 0-30A fuse blocks (one-, two-, or three-pole) onto various size rails to eliminate costly and time consuming drilling, tapping, and screw mounting. Adapters mechanically lock into mounting holes of fuse blocks in seconds to become an integral part of the block.

One adapter is required for one- and two-pole Cooper Bussmann blocks. Two adapters are required for three-pole blocks.

With the exception of the 32mm DIN rail, all blocks with adapters can be removed from a rail simply by pulling up its release tab.

Use of rail end-stops on both sides of adapters is recommended.

**Construction:** Molded from “Lexan™ 241” for high strength and flexibility.
