**General Information**

Cooper Bussmann offers a full line of ferrule style (cylindrical clip-mounted) fuses, designed and tested to meet standards and requirements in various locations around the world. Their unique design and construction provide:

- Superior cycling capability
- Low energy let-through (I²t)

Ferrule fuses provide an excellent solution for small UPS, small ac drives and other low power applications where space is at a premium.

**Voltage Rating**

All Cooper Bussmann ferrule fuses — except 690V — have been tested at their rated voltage. The 690V ferrule fuse has been tested to the IEC 60269 standard, which requires clearing at the rated voltage +5%.

**Accessories**

Ferrule fuses may be mounted in fuseclips, fuse holders, fuse blocks or fused switches. A variety of products are available. Please consult Cooper Bussmann Application Engineering to discuss your requirement.
Ferrule — FWA 150V: 5-60A

FWA  5-30A (10 x 38mm)  
35-60A (21 x 51mm)

Specifications
Description: Ferrule style high speed fuses.
Dimensions: See dimensions illustration.
Ratings:
Volts: — 150Vac/dc
Amps: — 5-60A
IR: — 100kA Sym.
Agency Information: CE, UL Recognition

Electrical Characteristics
Total Clearing I^2t
The total clearing I^2t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I^2t is found by multiplying by correction factor, K, given as a function of applied working voltage, E_g (rms).

Dimensions - in (mm)

</tbody>
</table>

Arc Voltage
This curve gives the peak arc voltage, U_L, which may appear across the fuse during its operation as a function of the applied working voltage, E_g (rms) at a power factor of 15%.

Power Losses
Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, K_p, is given as a function of the RMS load current, I_b, in % of the rated current.

• Watts loss provided at rated current.
• See accessories on page 216.

Features and Benefits
• Excellent cycling capability and DC performance
• Low arc voltage and low energy let-through (I^2t)
• Low watts loss in a compact size
• Used with finger-safe holders/blocks

Typical Applications
• DC common bus
• DC drives
• Power converters/rectifiers
• Reduced voltage starters

### Ferrule — FWP 690V/700V (IEC/UL):
#### 20-100A, Striker Optional

**FWP (22 x 58mm)**

**Specifications**
- **Description:** Ferrule style high speed fuses with and without indicating striker.
- **Dimensions:** See dimensions illustration.

**Ratings:**
- Volts: — 690Vac (IEC)
  - 700Vac (UL)
- Amps: — 20-100A
- IR: — 200kA RMS Sym.
  - 50kA @ 500Vdc

**Agency Information:** CE, UL Recognition

**Electrical Characteristics**

#### Total Clearing I²t

The total clearing I²t at rated voltage and at power factor of 15% are given in the electrical characteristics. For other voltages, the clearing I²t is found by multiplying by correction factor, K, given as a function of the RMS load current, Iₙ, in % of the rated current.

#### Arc Voltage

This curve gives the peak arc voltage, Uₜ, which may appear across the fuse during its operation as a function of the applied working voltage, Eₖ, (rms) at a power factor of 15%.

#### Power Losses

Watts loss at rated current is given in the electrical characteristics. The curve allows the calculation of the power losses at load currents lower than the rated current. The correction factor, Kₚ, is given as a function of the RMS load current, Iₙ, in % of the rated current.

*IEC/UL Voltage rating 690/700

#### Features and Benefits
- Excellent cycling capability and DC performance
- Low arc voltage and low energy let-through (I²t)
- Low watts loss in a compact size
- Used with finger-safe holders блок

#### Typical Applications
- DC common bus
- DC drives
- Power converters/rectifiers
- Reduced voltage starters

Ferrule Fuse Accessories

Fuse Holders

Specifications
Catalog Symbol: CH Series
Description: DIN rail mount fuse holders
Agency Information: cULus/cURus/CE
North American 10 x 38 Class CC: Listed UL 4248, Guide IZLT, File E14853, Certified CSA Std. C22.2 No. 39, Class 6225 01, File 47235
North American 10 x 38 Midget: Recognized UL 4248, Guide IZLT2, File E14853, Certified CSA Std. C22.2 No. 39, Class 6225 01, File 47235
European: 10 x 38 IEC 269-2-1, 14 x 51 IEC 269-2-1, 22 x 58 IEC 269-2-1

Features and Benefits
• Finger-safe design - No exposed contacts
• DIN rail mount (35mm) - Fits standard mounting rails
• Optional open fuse indication lights tells fuse status at a glance
• Handle/fuse puller easily installs and removes fuses
• Available in single and multi-pole configurations
• Wire ready lugs and spade terminal connections save installation time
• CE marking
• Available up to 1000Vdc
• PLC device available for remote monitoring

Typical Applications
• Switchboard panel, control consoles, small motors, transformers, and similar applications

Recommended Cooper Bussmann Fuse Types
Class CC North American Class CC Fuses - LP-CC, FNQ-R, KTK-R
10 x 38 North American Midget Fuses - FNQ, KTK, AGU, BAF, BAN, FNM, FWA, FWC, PV & DCM
14 x 51 Fuses - FWX, FWH, FWP & NON
22 x 58 Fuses - FWP

See pages 257 and 258 for CH Series fuse holder information.

Fuse Blocks
