

## Technical Support Specialist

Barr-Thorp Electric is seeking an individual to join our Wichita, KS sales team that is interested in helping customers apply new technologies in the automation and control environment. The ideal candidate should be capable of demonstrating the following skills:

- Knowledge of electrical motors and control
- PLC & HMI programming experience
- Engineering or trade school degree
- Computer skills such as MS Outlook, Word, Excel, & Powerpoint
- Ability to formulate solutions from loosely defined customer requirements

Responsibilities include:

- Review customer specifications and develop solutions
- Prepare formal proposals for solutions including documentation of conceptual design
- Product research & training
- Design, test and present solutions using demonstration equipment
- Respond to customer inquiries in timely and professional manner
- Troubleshooting and solving customer challenges with implementing solutions
- Work collaboratively with other employees and manufacturers towards the goals of the organization

This position has limited travel primarily for training purposes only. The compensation package includes sales incentives, 401k matching and health insurance.

Barr-Thorp Electric Company is an equal opportunity employer. Applicants receive consideration for employment without regard to race, color, religion, sex, age, national origin, disability or veteran status.
